

SIMPLY CLEVER

The new ŠkodaRoomster

Some views are known to surprise. Others are known to inspire. Some are best enjoyed alone. Others are worth sharing with your loved ones. That's why the new Škoda Roomster is big enough for a family and all its scenic adventures.

There are some views we discover by chance. There are others we often return to. Some provoke a smile. Others provoke our imagination. Some sights open our eyes. And then there are those that even open our minds.

The new Škoda Roomster comes with several design changes, lending it a more self-confident and dynamic expression. With the **new design** of the **front bumper**, the three-dimensionally shaped **front headlamps** and the new **front grille**, the car looks more robust yet friendly. The smiley expression is underlined by the **front fog lamps**, which have undergone both exterior and interior modifications and are now available with

daytime running lights. While the **roof railing** in an exclusive black/silver design is another new attribute, the **rear door handles** integrated into the dark columns or the extraordinarily large **rear side windows** remain characteristic elements of the Roomster model. The car may also be equipped with a **panoramic roof**, which stresses the original concept of the model being focused on roominess.

The new Škoda Roomster reflects a new attitude towards the environment and responsibility towards future generations. Using new technologies creates a balance between the need to be mobile and the need to view the world from a perspective of sustainable development.

The highest performance diesel engine developed for the new Roomster is the **1.6 TDI CR DPF/77kW** turbocharged 4-cylinder engine.

The **technology innovations** brought by the new Škoda Roomster are mainly represented by the engines. The new engine range responds to the need for **protecting the environment** and the continual **lowering of CO₂ emissions**. The **1.2 TSI petrol engines** excel with their flexibility, low noise and economy. Diesel engines, supplied with the **common-rail fuel injection system**, are noted for their quiet and refined operation and extraordinarily low consumption.

You may order additional features, such as **TPM** (Tyre Pressure Monitoring) and **start-up assistant**, supplementing the **ESP** (Electronic Stability Programme), which always includes **ASR** (Anti-Slip Regulation; deactivation button shown on the photo).

The new **automatic 7-speed DSG transmission** (Direct Shift Gearbox) designed exclusively for the 1.2 TSI/77kW engine guarantees comfortable yet dynamic drive with economic fuel consumption.

A look at the **dashboard** reveals not only design changes but also innovations to the offered steering wheels or comfort features, such as a **navigation system, radios** and **MDI** (Mobile Device Interface). The new **multifunctional 4-spoke leather steering wheel**, which enables you to control the radio and phone, is also available in a 3-spoke sports design. All instrument panel versions feature new functions, one of which is the **recommended gear shift** function, depending on the engine version.

The **MDI** (Mobile Device Interface) enables (by means of interconnecting cables with terminals for the iPod, Aux-in or USB, available from Škoda Genuine Accessories) control of a connected external device through the radio or navigation system.

The **Maxi DOT** multifunctional display shows, in addition to other information, the average fuel consumption or outdoor temperature.

In addition to maintaining the preselected speed, **cruise control** enables you to increase or reduce speed without using the pedals. This function is controlled by the button on the side of the cruise control.

The **Climatronic air conditioning** with electronic regulation comes with a new control panel.

The **Swing radio** is furnished with a dual antenna and music CD, CD-MP3 and CD-WMA player.

You control the **Amundsen navigation system** with a 5" colour touch-screen.

The car's **safety** is undoubtedly one of the most important matters. That is why the new Škoda Roomster is equipped so that it not only protects the driver and passengers in crisis situations but also helps prevent them. Whether you evaluate the construction, driving characteristics, driver's comfort, view from the vehicle or its visibility, you always find solutions that lead to your maximum safety. In addition, you may be protected by up to 6 airbags: **driver and front passenger airbags, front side airbags and head airbags.**

The **sun shields** will prevent unpleasant sun glare.

The rear seat passengers' safety is enhanced by three **height-adjustable headrests.**

The vehicle may also be equipped with **tilting halogen projector headlamps** for the enhancement of corner driving safety.

The **fog lamps** with the **daytime running lights** are also available with the optional **Corner function.** This feature automatically switches on either the right or the left fog lamp, depending on the angle of the steering wheel and the activation of the turn indicators, at a maximum speed of 40 km/h.

The car may be equipped with an **alarm** with interior monitoring, a horn with back-up power and an inclination sensor. Optional **deactivation of interior monitoring** (see photo) will especially be welcomed by dog owners.

The standard safety equipment of new Roomster cars includes a **mount preparation for two child seats with the Isofix system** including special safety belt anchoring, which is an essential part of the **Top Tether child seat.** Child safety seats for children of all age groups can be found in the **Škoda Genuine Accessories** range.

If you wish to place the child seat on the front passenger seat, you'll need to equip your car with the optional **deactivation of a passenger airbag.** Once installed, you can turn off the airbag with a key.

When manoeuvring the vehicle in a tight space, you will appreciate the **parking sensors**, which monitor the distance of the rear bumper from a potential barrier.

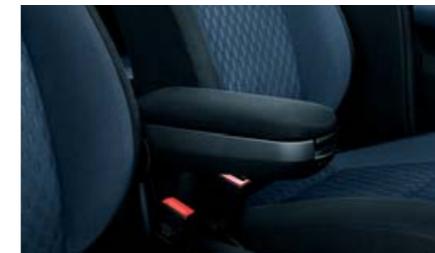

The **exceptional roominess and airiness of the interior** is facilitated by the original concept of the model, which is focused on the comfort of the whole crew. Passengers on the **raised rear seats** will feel like they are in the cinema and can enjoy a unique view of the passing world from the **large rear side windows**. The spacious feeling of the car may further be amplified by the 0.82m² **panoramic roof** made of laminated glass, which prevents excessive heating of the interior and at the same time protects the crew from UV rays.

The rear passengers' level of comfort may be increased by the **foldable table with a drinks holder** integrated into the rear centre armrest.

The **central console drinks holder** is a welcome addition, especially for the rear seat passengers, but is easily accessible from the front seats as well. Other storage options are provided by the **pockets on the front seat backrests** and **storage compartments in the rear door panelling**.

The **adjustable armrest** between the front seats houses an unexpectedly spacious storage compartment of 1.2 litres.

The **storage compartments in the dashboard** are available in two versions, either open or closed. The lower compartment may be illuminated and, in combination with the Climatronic air conditioning, cooled.

The **storage compartments in both the driver and front passenger's door panelling** provide a 1.5l bottle holder and a practical rubber band to hold a map or magazines.

A hidden storage space for various small objects can be found in the **drawers with tilting lids** situated under the front seats.

Even with the seats in their base positions and with five passengers in the vehicle, an exceptional **luggage compartment** is at your disposal. Its capacity is, depending on the position of the rear seats and backrests, between **480 and 560 litres**. In addition, we offer you various accessories, which increase the practicality of the luggage compartment and help you keep the car tidy. For example, the **set of nets** prevents movement of, and possible damage to, the transported luggage.

The **mid-level luggage compartment floor** provides a suitable storage place to keep things that you don't want to unload every day. In addition, it places the bottom of the luggage compartment on the level of the loading edge, facilitating easier luggage handling.

The **dividing net**, usually fixed behind the rear seats, separates the cabin from the luggage compartment. The **2-position luggage compartment cover** allows, when fixed in the lower position, the transport of objects that would otherwise impede the driver's view.

The **flexible storage compartment** may be used to fix smaller objects.

The roominess is accompanied by an **exceptional variability**. The car is equipped with the unique **VarioFlex rear seating system**, which enables you to adjust the car's interior to your current transport needs at any time. The system consists of 3 independently adjustable rear seats. The operation can easily be performed by a single person and without the need for any tools. By removing the seats you gain a **storage area with a capacity of 1,810 litres**.

The **backrests of the rear seats** may be completely **tilted** toward the sitting sections.

All of the **rear seats** may be **removed** together or individually as required. If you remove the middle seat, you can **shift** both side seats 110 mm towards the centre.

You can **shift** the **rear side seats** 80 mm forward and 70 mm backward from their base positions. The **backrests** of the seats can be **positioned** as needed.

A gold Skoda Roomster Scout is shown from a high-angle perspective, driving on a dirt road that winds through a rugged, mountainous landscape. The car is moving towards the left, kicking up a cloud of dust behind it. The terrain is characterized by dark, rocky hills and a winding river with a vibrant blue-green hue. In the background, there are more mountains under a clear sky. The lighting suggests late afternoon or early morning, with long shadows and a warm glow.

Some views begin where the road ends. They stretch beyond what maps can reveal.
Discover them in a journey that's as unique as the new Škoda Roomster Scout.
It's a car that can help you escape the city but can also bring you back.

Some views don't just end. They simply lead us to new ones. Just when we think we've seen it all, they surprise us from a whole new point of view. Visit such breathtaking scenes with every journey in the new Škoda Roomster Scout.

The **rear bumper spoiler** and the **silver lower cover** give the car rear a robust appearance.

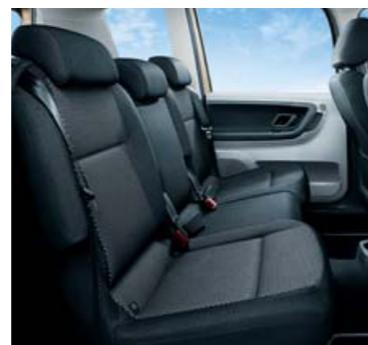

With the integrated **interior bicycle holder** you can comfortably transport 2 bicycles.

Plastic covers on the bumpers, sills and lower parts of the doors emphasise the car's uniqueness, along with **alloy wheels** especially developed for the Scout, available in the same design in two different sizes: the 6.5J x 16" **Arktos** (see photo) and the 7.0J x 17" **Kentaur**.

The **new Škoda Roomster Scout** is the ideal partner for an active lifestyle. It will fascinate you with its attractive cross-country vehicle appearance, comfortable equipment and variable interior space.

The **Scout interior** is designed in a grey/black colour with an Onyx/Onyx or Onyx/Silvergrey dashboard. Options also include the partially leather **Floss** interior (leather/artificial leather/fabric) or the **Pulse** interior with sports front seats.

The **VarioFlex rear seating system** will allow you to rearrange the interior according to your current needs.

The **noble steel foot pedal covers** and the **removable woven carpets** with grey stitching are comfort as well as practical accessories.

Roomster Comfort represents the most attractive equipment version of the model. It comes with the Chess interior in black with the Onyx/Onyx dashboard or, upon request (without extra charge), in beige with the Onyx/Ivory dashboard. The interior is decorated with a number of chrome details including the gear stick knob and frame, air inlet frames and handbrake safety button. The standard equipment of the Comfort version further includes a height-adjustable driver seat, central locking, on-board computer, electric front windows, front reading lamps, 1.5l bottle holder in the storage compartments in the front door panelling and so on.

Roomster Active is a sports-oriented equipment version. It's offered with the Domino interior in black or grey with the Onyx/Onyx dashboard and with a 3-spoke sports steering wheel. This version will also please you with chrome details, including the gear stick knob and frame, air inlet frames and handbrake safety button. The standard equipment of the Active version further includes height-adjustable driver seat, central locking, on-board computer, electric front windows, front reading lamps, 1.5l bottle holder in the storage compartments in the front door panelling and so on.

Roomster Style is available with the elegant Domino interior in grey or black with the Onyx/Silvergrey or Onyx/Onyx dashboard. Also this version is decorated with chrome details, including the gear stick knob and frame, air inlet frames and handbrake safety button. The standard equipment of the Style version further includes a height-adjustable driver seat, central locking, on-board computer, electric front windows, front reading lamps, 1.5l bottle holder in the storage compartments in the front door panelling and so on.

Roomster is the basic equipment version and it's equipped with the nice Stone interior in blue or grey with the Onyx/Silvergrey or Onyx/Onyx dashboard. The standard equipment of the Roomster version further includes a driver and passenger safety seat belt warning light, front reading lamps, 1.5l bottle holder in the storage compartments in the front door panelling and so on.

Pulse interior in grey/black with sports seats and Onyx/Onyx or Onyx/Silvergrey dashboard (top left photo).

Floss interior in black in fabric/leather/artificial leather with Onyx/Silvergrey or Onyx/Onyx dashboard (top right photo).

Drops Blue interior with Onyx/Onyx or Onyx/Silvergrey dashboard (bottom left photo).

The interiors shown above are available as extra equipment, from which you can select other attractive products, such as the small leather package (steering wheel, handbrake handle and gear stick knob), Climatronic air conditioning with electronic regulation, Swing and Blues radios, Amundsen navigation system, roof racks, 14"–17" alloy wheels and so on. For up-to-date information on the wide range of extra equipment for the Fabia model versions contact your authorised Skoda partner.

Škoda Genuine Accessories

The Škoda Genuine Accessories allow you to emphasise the uniqueness of the car, maximise its practicality and enhance its comfort. In our range, which is essentially an extension of the extra equipment, you will find various products including alloy wheels, leather accessories, sunblinds, radios, navigation systems, foot mats, child seats for children of all age groups and so on. To get a full overview of our range of products, ask any Škoda authorised partner for our special accessories catalogue.

The **Rubber boot mat** helps to keep the luggage compartment clean and at the same time protects the original lining against damage.

The **thermo-electric cooling box** with 15-litre capacity will enable you to keep food and drinks fresh and refreshing in any weather.

The **decorative door sill covers** enhance the attractiveness of the car and at the same time protect the sills against mechanical damage.

The **roof transportation systems** will especially be appreciated when carrying various sports equipment. A genuine Škoda box with 380-litre capacity, which successfully passed the City Crash test, is also available.

Merchandise

Lanyard for keys or a mobile phone with a display cleaner

Ballpen in blue with "ice" effect.

Large travel bag in black/blue colour design.

General information

ŠKODA SERVICE

Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

We offer you first-class quality

Your car requires advanced technology. For this reason, all the Škoda authorised service partners have special tools and quality diagnostic systems at their disposal which in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service partners in order to provide them with up-to-date information important for their activities.

Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

Comprehensive range of services:

- **Service inspections**
For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you when the service inspection must be done.
- **Body and paintwork service**
Damage to the body and painted areas following an accident will be fixed by your authorised Škoda service partner in an expert manner, in accordance with information from the manufacturer, using Škoda genuine parts. This is important not only for your safety, but also for functionality and maintaining your car's value.
- **Courtesy car**
The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.
- **Pick-up and delivery service**
If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers, which may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

ŠKODA GENUINE ACCESSORIES

Škoda Genuine Accessories offer you child safety seats, roof rails, alloy wheels, sunblinds and more. For more detailed information on the complete Škoda Genuine Accessories range see the individual Škoda model catalogues.

ŠKODA GENUINE PARTS

Safety

Škoda genuine parts are identical to those used during the assembly of Škoda vehicles. The use of first-class materials and technologies guarantees safe and worry-free driving.

Availability

Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's batch production and does not merely focus on high-turnover parts. Škoda ensures the provision of genuine parts even after the relevant model is discontinued.

Long service life

The use of first-rate materials and production technologies in the manufacture of Škoda genuine parts ensure their maximum reliability and long life.

Environment protection

The Škoda Genuine Parts range includes exchange parts whose production has a low environmental impact in terms of waste, excess heat and water pollution.

INFORMATION ON THE INTERNET

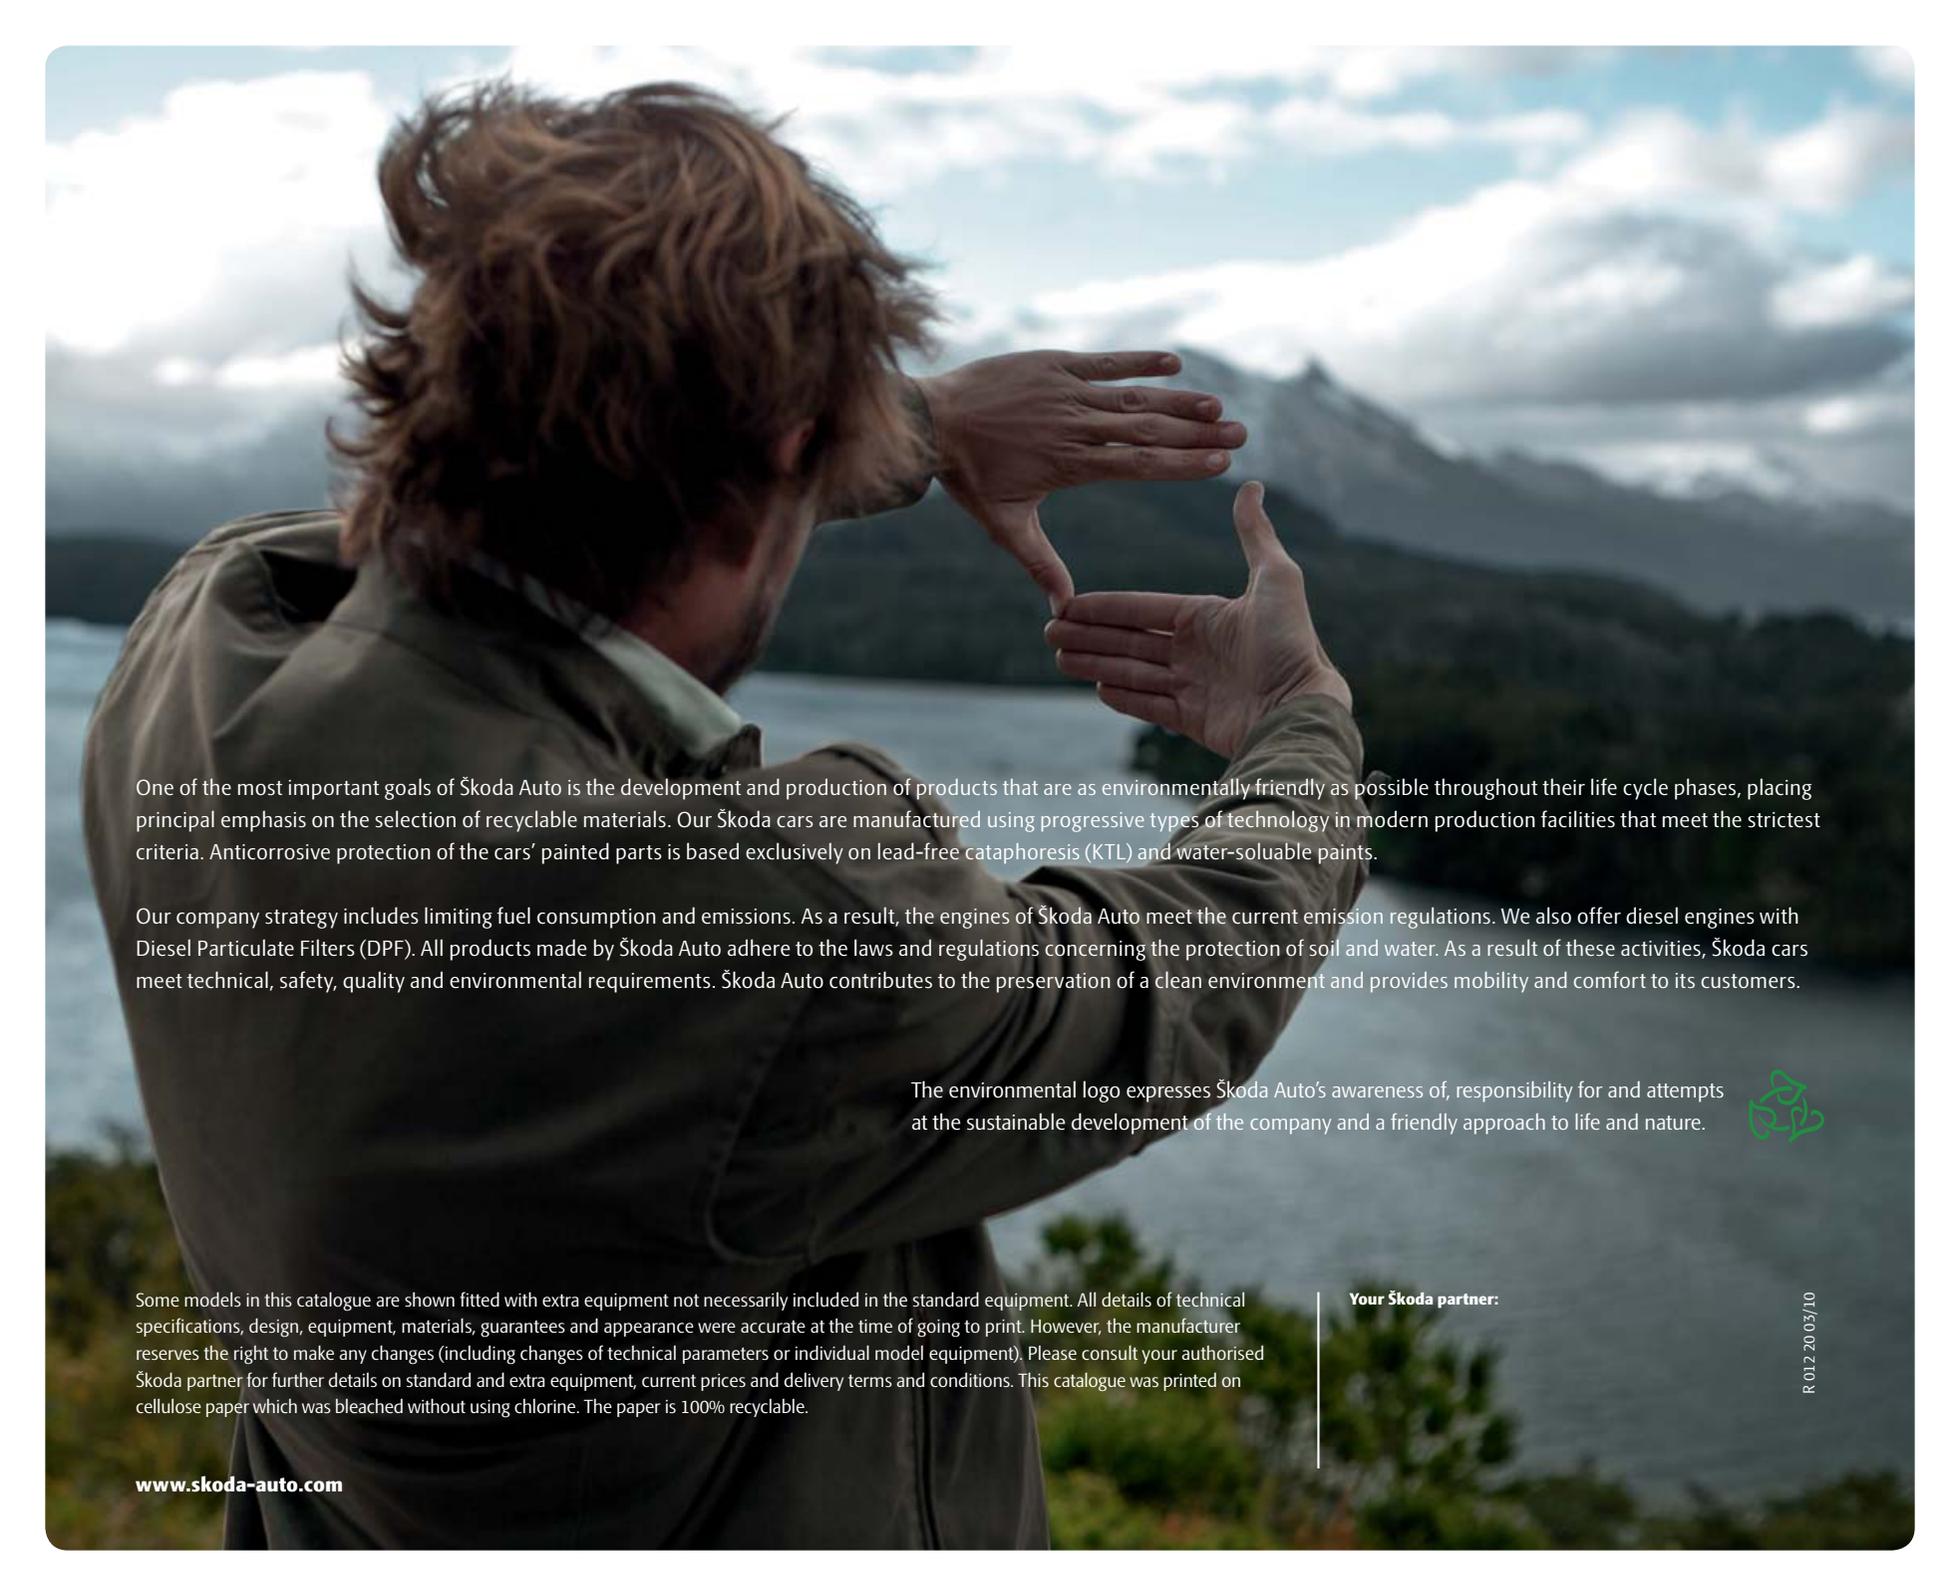

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models.

ŠKODA FINANCE

ŠkoFIN offers solutions for both individuals and businesses. You can learn about the current offer through any authorised Škoda partner. The credit or lease contract can also be concluded online directly with the car dealer.

GLOBAL FLEET

The Škoda Auto Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of Škoda cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and, as a result, excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
