

The Transglobal Motorhome

The Fuso Canter is reputed to be the most sold light truck in the world, widely available throughout all continents. Mitsubishi Fuso is a part of the Daimler AG organisation, which is the world's largest truck manufacturer, and therefore in Europe they provide all Fuso Canter service and parts support through Mercedes-Benz.

The strong Canter chassis has a maximum gross weight of 6.5 GVW, providing a substantial gross payload of 1850kg on the EX 460 (dependent on accessories fitted).

The EX 460 layout has a comfortable fixed double bed in the rear, which is located over the large rear garage. Access to the bed is via fold-down steps.

The EX 460 benefits from a separate shower cubicle, opposite the wash-room. The raised seating area at the

front of the cabin seats four comfortably and can be converted into a further double bed for guests. Additional storage is housed below.

The EX 460 base model is fitted with a compressor refrigerator, diesel heating and carries 200l of fresh water as standard. The high security door with electric folding step and crawl-through hatch between the cabin and the drivers cab with a heavy duty insulated cover, provides extra security on this model.

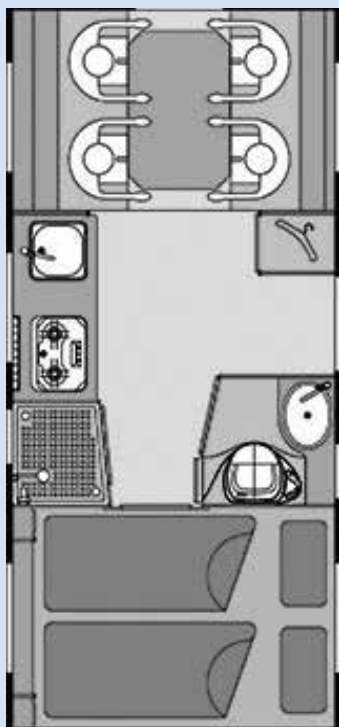

There is a huge capacity for storage within the wardrobe, locker cupboards and in the external garage to utilize the massive payload.

As with all bimobils a high level of customisation is possible by utilizing the optional extras in order to upgrade the vehicle to suit your own individual needs.
