<sup>1</sup> For full details of fuel consumption and costs included in the OTR (On the Road) package, ask your Van Centre. Dimensions as detailed in the Amarok brochure.  
<sup>2</sup> Unladen weight figures are calculated with a full supply of fuel in the tank, oil, water and other operational fluids and the equipment with which the vehicle is fitted as standard; but without the driver, crew or any other payload; and without any options or accessories not fitted as standard. Gross vehicle weight is the maximum permitted weight of the vehicle (with a full load, driver and any crew etc.). Payload = gross vehicle weight minus unladen weight.  
<sup>3</sup> All weights and payloads are for vehicles with standard specification and are subject to normal manufacturing tolerances. The addition of factory options or Volkswagen Van Centre fitted accessories will increase unladen weight and reduce payload accordingly. For further information about the impact of options and accessories on the payload please contact your local Volkswagen Van Centre.
