*"The DoubleBack has been inspired by a desire to see a truly spacious, comfortable camper with all the practical advantages of a smaller vehicle."*

Model shown: Doubleback with optional VW 'Sportline' Package.

# Revolutionary

adjective /,revə'looSHə,nerē/

involving or causing a dramatic change

The Doubleback represents the first true innovation in the market since the elevating roof over thirty years ago.

We've fused the ease and practicality of driving a compact VW Transporter with space levels approaching that of a full motorhome.

Revolutionary design. Revolutionary functionality.

Now you *can* have the best of both worlds

# Do More, Much More

The DoubleBack is exactly the same size as a regular VW Transporter when you're on the move. In fact, even at close inspection it's almost impossible to spot the difference.

As the rear door still opens normally, in day to day use you can still carry around whatever you like as you would in a regular van.

Park up though, and in under 45 seconds you can slide out the rear section electronically to almost double the space, giving you two usable rooms.

You could use one of the rooms to stretch out and relax. Maybe use another to get changed or cook dinner.

# Freedom

03

Arrive. Make yourself at home. With a carrying capacity in the rear pod of over 500kg, you can take whatever you like in a DoubleBack.

# Inside a DoubleBack

With the DoubleBack, space no longer needs to be at a premium.

You'll be pleasantly surprised at just how much room there is.

The kitchen/living area is in the central part of the van, and the sleeping/ storage/ changing area is located in the Pod. No more hassles about putting away the bed before you can use the kitchen.

The fully functional kitchen contains a high quality SMEV Double burner and sink combo, and a WEACO 50-litre fridge with ice box.

A large and removable Vohringer swivel table completes the entertainment and dining area.

In the rear Pod room, a comfortable fold away double bed (with optional slide out storage drawers) means you can catch up on your sleep in comfort.

If you love looking up at the stars, we even have an optional Glass Roof available for the Pod.

Full downlighter LEDs ensure that the entire interior of the van is attractively lit.

In fact, we can customize the interior to meet most customer requirements – please call for details.

# Family & Festivals

The Doubleback is ideal for those breaks with your loved ones. Whether you're going to a festival or just exploring the countryside, you'll find the additional space invaluable. Not everyone wants to be sitting knee to knee in the back of a cramped campervan.

The DoubleBack is based on the very popular VW Transporter T5, the average fuel consumption is

over 36 MPG.

...We think you'll agree that this compares favourably with any camper or motorhome on the market today.

Pick your destination and enjoy the trip a little more with a Doubleback.

# Sports & Outdoor

We love great design blended with great functionality.

The Doubleback is designed to meet the requirements of both professional and amateur sports – whether you're into climbing, motocross, karting, surfing, cycling....the list is endless.

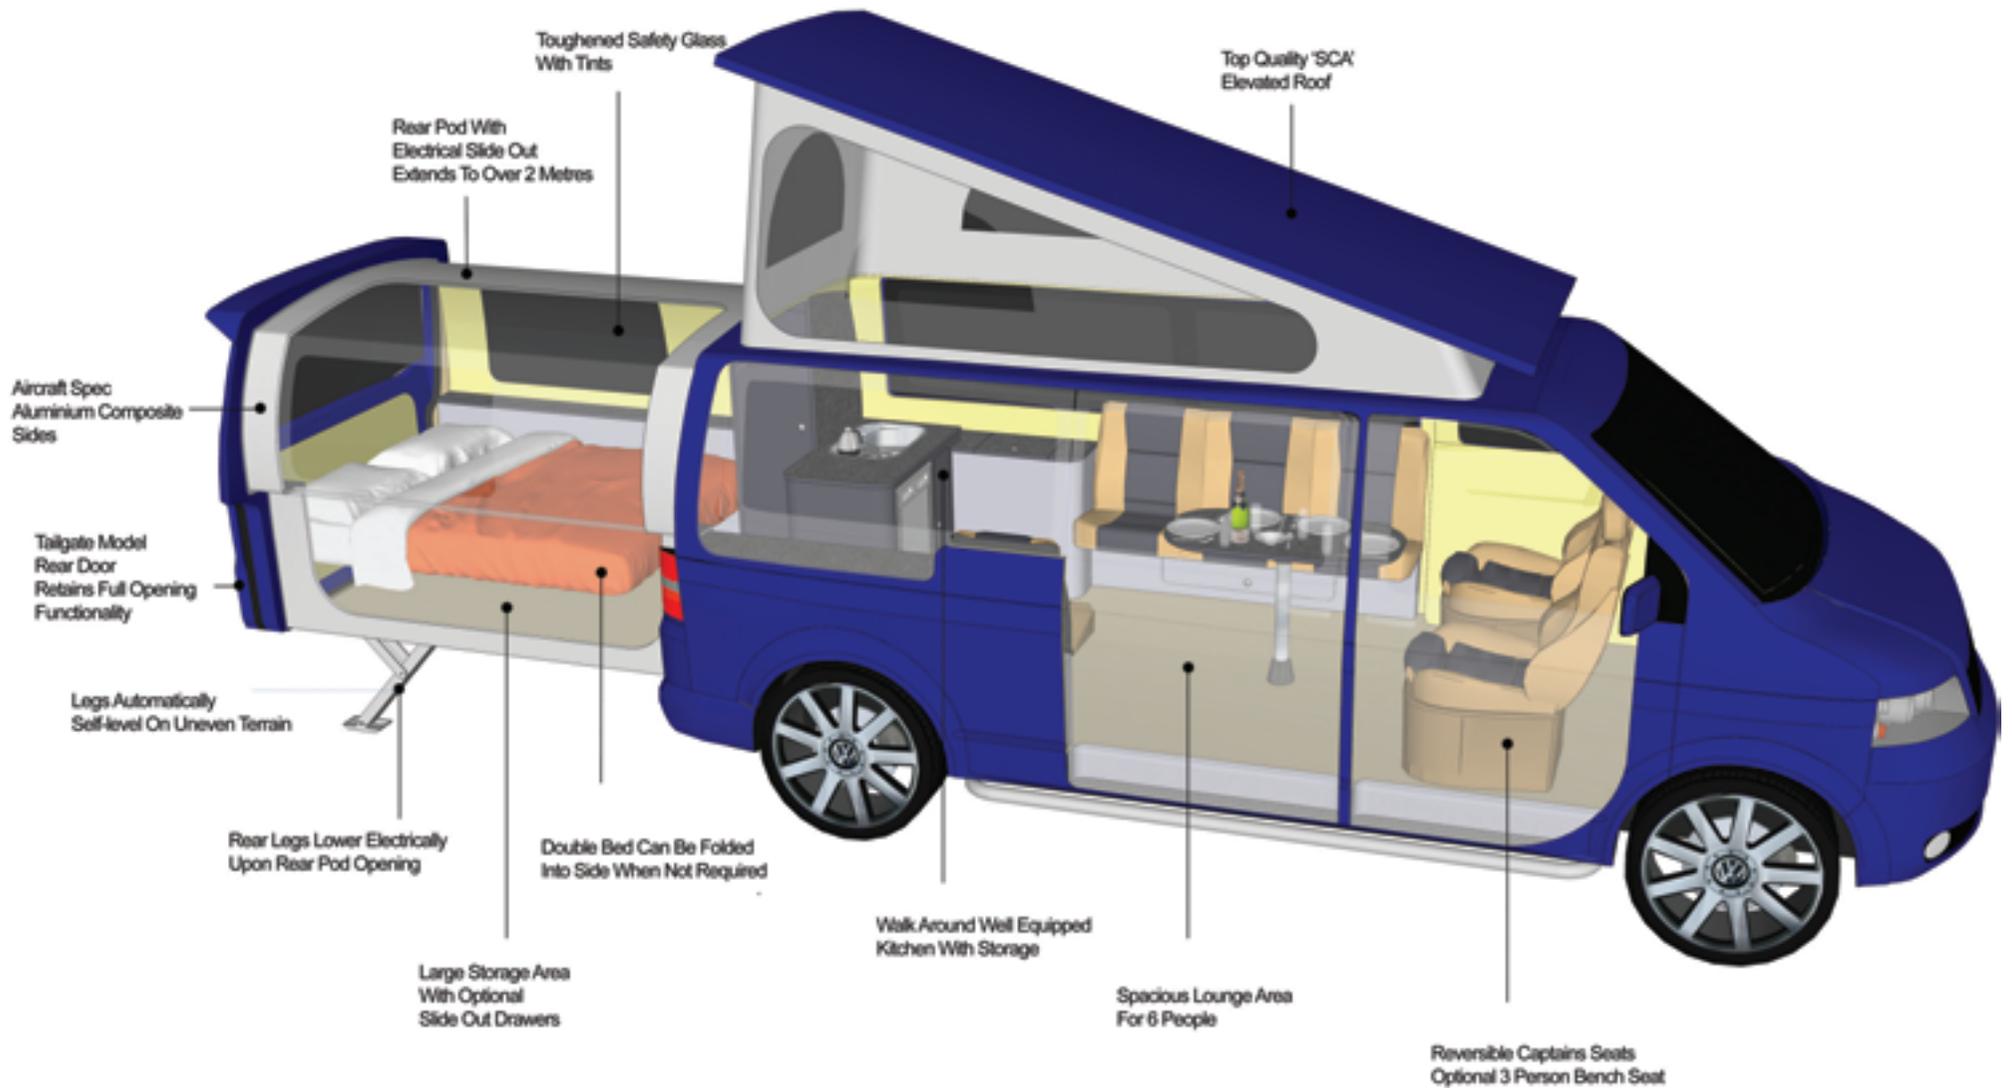

Love your biking? Carry internally four bikes or a scooter (with optional ramp) –you can park these inside the vehicle and worry a lot less about security.

Of course if it's surfing you're into, you can pack away a full set of longboards and still have a huge amount of space.

Whatever you're into, complete your adventure with a DoubleBack

# Adaptable

### High Technology Construction

The DoubleBack's technology incorporates aircraft industry techniques and materials in its build. This lends great strength for minimal extra weight; the slide out extension weighs less than 150kg. The Pod is hand built from honeycombed aluminium and is available in a number of different finishes.

### Best of Both Worlds

- No more navigating narrow country roads in a large motorhome.
- No more worries about finding a big enough space to park.
- Less to spend on fuel. More to spend when you get there.

# Specifications

We love customisation and understand how important it is to get your vehicle just the way you want it. In addition to the Standard Option List, we can fully customize your van to suit your tastes and your budget.

If it can be done, we'll do it for you. Your DoubleBack... your choice.  
The Doubleback is available in a 2 or a 3 seater configuration

## Doubleback VW Transporter Standard Configuration

- Large removable 'Vohringer' swivel table
- TV/DVD player
- Fire extinguisher
- Fully insulated and carpeted central section

#### Notes:

1. Should you wish to further upgrade the host vehicle, please consult the VW Transporter Vehicle and Options List for details. Changes to be added to the DoubleBack price.
2. Please note there are no rear seats in a DoubleBack that are suitable for carrying people on public roads. A standard DoubleBack comes with two Captains Chair style seats to carry 2 persons. If you wish to carry 3 persons then you will need to select the bench seat option on your VW Transporter. (no charge option)
