

Amundsen

Pioneer and trendsetter

Innovation, design and quality – these three words have characterised Westfalia for more than 60 years. Thanks to these characteristics we have also become a reliable OEM partner for the automotive industry, be it Opel, VW, Ford or Mercedes.

Setting standards – this has been Westfalia's guiding principle for over 60 years. In 1951 Westfalia was the first company to convert a VW Bully into a motor home.

In the following six decades Westfalia created legends in Wiedenbrück such as the James Cook, the Sven Hedin, the Club Joker, the California Exclusiv, the Marco Polo and the Columbus. Although these vehicles were all quite different, they were all milestones in the development of motor homes – innovative solutions paired with perfect

craftsmanship and uncompromising quality. This made Westfalia what it is today and defined our commitment to the future.

*Milestones in development.
Then as now!*

Pioneer & trendsetter

Space & dynamic appearance

Stylish, bright and inviting

With more than 60 years of experience, Westfalia is a real pioneer in motor home manufacturing. We not only bring these decades of experience to the development of new vehicles, but also the passion and enthusiasm of our employees can be felt and lived in each vehicle that leaves our factories in Wiedenbrück in Westphalia. This is also true for the new Amundsen.

Once you enter the Amundsen you will immediately be struck by the inviting and bright interior design of this youngest addition to the Westfalia family. The materials and

colours used form a pleasing whole and give a lively and fresh appearance to the Amundsen interior. The white colour of the furniture flaps, the low-key grey upholstery, and the silver and black highlights make for a contemporary and high-quality overall impression.

The double bench was developed exclusively for the Amundsen and includes two seats with safety belts. Its appeal lies in its very comfortable and ergonomically shaped cushions. Turning the driver and passenger seats 180 degrees creates a cosy sitting area, where up to

four people can sit comfortably. During the day the large windows admit plenty of light and at night a carefully designed illumination system will keep everyone in bright spirits.

See for yourself. Come inside and upgrade to the Westfalia class.

▼ The table from the living room dinette can be attached to the exterior of the kitchen, thus allowing you to enjoy your breakfast outside.

▲ The seat cushions in the Amundsen are ergonomically shaped, so you can sit in comfort without becoming tired.

Rest & relax

Relaxation is what it's all about. What style of bed you prefer is up to you. In the Amundsen series you have the option of two different bedroom styles.

Sweet dreams

Westfalia motor homes will first delight you and secondly convince you. Experience the passion that goes into building our motor homes every day you are on the road in one of our vehicles.

Just take a look at the sleeping area in the new Westfalia Amundsen. Depending on the floor plan, you can choose between a rear double bed and two single beds. In the Amundsen 600 D, the rear double bed transverse to the direction of travel provides a sleeping surface of 140 x 197 cm, while in the Amundsen 640 E the 75 x 200 cm

and 75 x 185 cm single beds invite you to have a rest. You can create a large 197 x 185 / 200 cm double bed simply by closing the gap between the two single beds with inserts.

The comfort zones in both bedroom styles are, of course, equipped with a well-thought-out spring system, so you can have a good night's sleep and enjoy the activities of the new day relaxed and well-rested.

▼ Large windows and numerous LED spotlights provide a light and inviting ambience.

◀ The seating area easily converts into an additional bed.

◀ The spring system in the comfort zones together with the quality mattresses will give you a great night's rest.

Living & staying

Functionality in its most attractive form – the kitchen in the new Amundsen is a true masterpiece, and not only with regard to its looks.

Enjoy your meal

Love, good food and well-being belong together. Not only will you appreciate your new kitchen in the Amundsen, you'll love it for just that reason.

Functionality matches innovative design – would be a good heading for this area of the motor home. The powerful 2-burner-hob is linked to a generously sized counter top where you can prepare your food in the blink of an eye. The sink with its one-lever mixer is located under part of the counter top. The numerous easily accessible compartments offer just the right

storage space for your kitchen utensils, from dishes and cutlery to pots and pans.

The 95-l-compressor-type refrigerator is located under the counter top and is also close at hand. By the way: You can choose to have the refrigerator placed on the counter top to gain an additional storage compartment.

Sophisticated and perfectly designed. This is the new kitchen in the Westfalia Amundsen.

► *Optionally the refrigerator can be placed above the counter top to gain additional storage space underneath the refrigerator.*

▲ *The 2-burner-hob and sink are ergonomically aligned.*

▲ *Westfalia engineers even thought of an extension of the counter top.*

Bathroom

▲ *Convincing design and function in the bathroom of the new Westfalia Amundsen.*

Start the new day well rested and refreshed – in the new bathroom of the Westfalia Amundsen.

Refreshed – ready for a new day

The bathroom – just as all the other functional areas – has been completely redesigned. The result is a new standard when it comes to combining space, function and form. The full shower, the appealing mirror cabinet, the washbasin – all areas have been linked in such a way that you will be able to refresh comfortably and without feeling crowded. Many storage surfaces and hooks contribute to the bathroom's tidy look – even after it has been used. The skylight not only admits sunlight but also serves to ventilate the air from the bathroom to the outside.

It is all these small details that make the difference. Only people who are enthusiastic about their product – like our employees – can make a product for enthusiastic customers like you. This is why we talk about the Westfalia class.

Innovative technology

There is so much more to building a motor home than just stringing together different functional areas. It is the comprehensive solution that has to be convincing.

For this reason our engineers do not settle for simply using well-known solutions. In many cases it is about breaking new ground. Take the heating system in the new Amundsen for example.

The new and powerful Truma 4 kW Combi hot air heating system makes its first appearance at Westfalia. It is important for this system to lay the

air ducts in a sensible and reliable way. We could easily have placed the heating system in the rear or in the wardrobe like almost all our competitors. However, we are convinced that placing the heating system in the middle of the vehicle and underneath the bench is best as regards heating demand and noise control. This new Westfalia "Center of the Car" concept not only gave superior test results, but the manufacturer's employees were also impressed by the new solution developed by Westfalia. Most importantly you – our customers – will benefit from this every day. This is ultimately what motivates us.

▲ Everything under control – the central operating unit.

▲ The vehicle rear offers plenty of storage in the compartments under the beds.

▲ *Even the vehicle floor contains storage compartments – this is optimum use of space.*

► *The storage in the rear of the Westfalia Amundsen.*

◀ *You will find a wardrobe with a clothes rail at a good height behind the bench.*

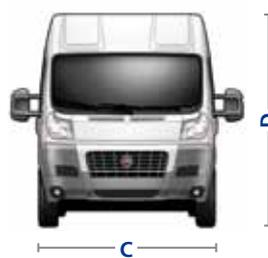

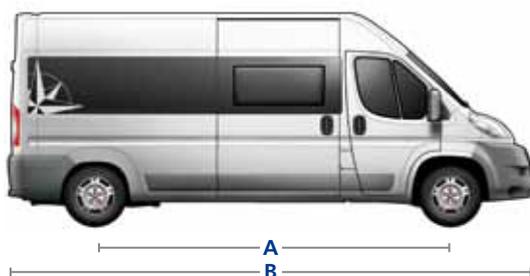

◀ *The solid quality of the Westfalia vehicles can also be seen in the furniture fittings and locking mechanisms.*

Technical data

Vehicle basis	Fiat Ducato
Diesel engine / transmission	115 Multijet; 85 kW (115 HP) / 5 gear manual transmission 130 Multijet; 97 kW (130 HP) / 6 gear manual transmission 150 Multijet; 112 kW (150 HP) / 6 gear manual transmission 180 Multijet; 134 kW (180 HP) / 6 gear manual transmission optional semi-automatic transmission
Length / width / height Amundsen 600 D	5,998 mm × 2,050 mm × 2,600 mm
Length / width / height Amundsen 640 E	6,363 mm × 2,050 mm × 2,600 mm
Wheelbase Amundsen 600 D / 640 E	3,450 mm / 4,035 mm
Mass in running order (DIN 1646-2)*	Amundsen 600 D: 2,890 kg, Amundsen 640 E: 2,995 kg
Permissible total weight	3,300 kg (optional: 3,500 kg)

Dimensions

Measurements: Amundsen 600 D

- A:** Wheelbase 4,035 mm
- B:** Length 5,998 mm
- C:** Width 2,050 mm
- D:** Height 2,600 mm

Amundsen 640 E

- A:** Wheelbase 4,035 mm
- B:** Length 6,363 mm
- C:** Width 2,050 mm
- D:** Height 2,600 mm

* Mass in running order includes driver, full fuel tank, fresh water 90% full, gas store with filled bottles, as well as tools, adapter cables and extension cables.

For more than 60 years Westfalia has been converting vans into motor homes. A rich experience for your benefit.

This is the Westfalia class

You will have seen the expression "Westfalia class" in this catalogue a number of times. You will see that this expression is so much more than just a marketing claim when you take the time to take a closer look at a Westfalia.

It is the choice of materials that captivates at first sight and convinces at second sight thanks to their durability.

It is the workmanship where Westfalia sets standards. As a partner of the automotive industry we are used to meeting the tolerances of

car manufacturers; this is why we talk more frequently in μm than in cm in our vehicles.

It is the quality with which each vehicle is built here in Wiedenbrück: craftsmanship matched with innovative manufacturing processes.

It is the readiness to innovate that makes each Westfalia motor home a milestone in its respective vehicle class. New solutions and trendsetting constructions that are available exclusively at Westfalia.

▼ *Quality you can see at first glance.*

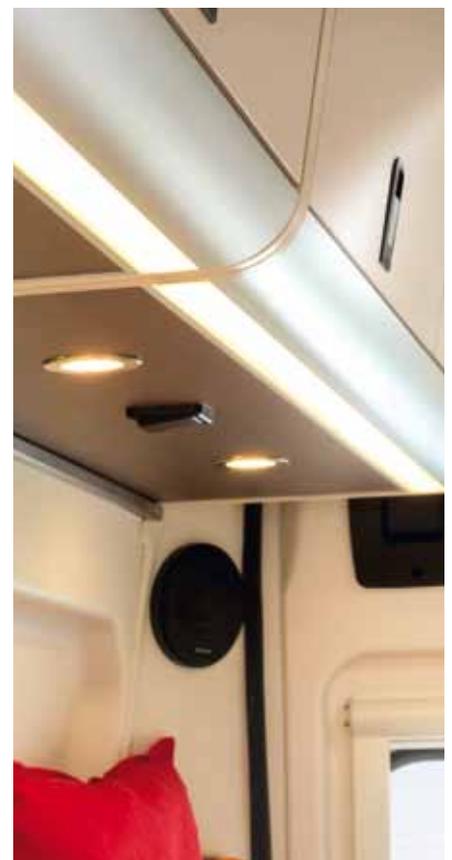

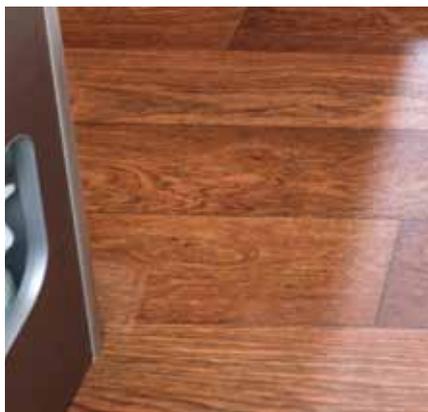

▲ *Westfalia class – visible even in the smallest details!*

▼ *The sophisticated lighting concept ensures a permanent ambience of well-being in the vehicle. Luxurious and practical: The spotlights are integrated into the furniture elements.*

► *In perfectly matching colours, functional and durable – the materials and surfaces in the new Westfalia Amundsen.*
