Windows	7 + 1 door window	Resolux lamps	3
Roof hatches	2	Halogen spots/lamps	6
Exterior storage compartment doors	4	Entry light	1
Fresh water	120 L	12V socket	4
Waste water	80 L	Secondary battery	80 Ah
Gas bottle compartment	2 x 11 kg	Charge regulator	Tremat
Gas regulator	Truma Secu Motion-Duo Comfort	220V exterior inlet socket	CEE
Truma Combination Heater	4	220V interior sockets	3
Boiler	10.0 litres, integrated	Fuse	Netzmatic with Fi
Fridge	97 L	Automatic charger	16 A
Toilet/Waste water tank	Cassette C200CS / 19 L		

### Interior dimensions

Length without overhead bay	3,380 mm (approx. 133 in.)
Width	2,260 mm
Standing height max./min.	1,980 mm
Overhead bay headroom max.	690 mm
Inside height of double floor compartment	280 mm

### Bed dimensions

Overhead bay	1,600 x 2,150 mm
Rear	2 x 750 x 1,870 mm
Front	1,050/950 x 1,910 mm

### Base vehicle Mercedes-Benz Sprinter

Vehicle type	Double cab	
Engine type	TDI	TDI
Engine Power	111/150 kW/HP	135/184 kW/HP
Displacement	2148 cc	2987 cc
Tank volume	75 L	75 L
Wheel base	3665 mm	3665 mm
Turning circle	13.5 m	13.5 m
Standard equipment	Airbags for driver and front passenger, stay mounted exterior mirrors with wide angle section, adjustable steering wheel, comfort driver and front passenger seats with armrests and headrests, overhead storage tray, mud shield front, windshield with colour strip, instrument panel with stowage tray, glove-box with light, auxiliary heater, radio preparation, ambient temperature indication, central locking with remote control, reinforced chassis with roll-reduction, reinforced front axle, warning flasher, warning triangle and first-aid kit.	

### Weights

Vehicle version	Twin tyre rear axle
Max. gross vehicle weight	5,000 kg
Curb weight *	3,510 kg
Payload	1,490 kg
Max. number of persons	6
Decrease of payload with quick-mounting system	-185 kg
Trailer load	on request
Roof load	100 kg

### Exterior dimensions

Length	6,850 mm
Width	2,380 mm
Height	3,220 mm
With quick-mount system	Length + 5 cm, Height + 5 cm

\*incl. driver, full fuel tank, water and gas at 90% filling level, boiler full, cable drum.

Date: 02.2011

# The travel vehicle BJ 330

Distinction is our Trademark!

**1** The BJ 330 is a compact family camper cabin mounted on a Mercedes-Benz Sprinter double cab. Thanks to the exclusive bimobil quick-mounting system, you can separate the carrier vehicle and cabin in a matter of minutes. The interior with its many details is bright and inviting.

During the drive up to 6 persons can ride in safety in the double cab. A cosy front settee constitutes the core of the cabin layout, complimented by two bunk beds in the rear, a generously sized overhead bay, a kitchen and shower, as well as plenty of storage in the space provided by the double flooring. An extraordinary option – a big side liftgate – turns the settee into a veranda with panoramic view of the surroundings.

As usual with bimobil cabins, our model BJ330 boasts a top-notch construction – extremely rugged and durable, superior insulation and the best construction materials. The bright and inviting interior with its fresh bimobil fabric colours lends our model BJ330 a special touch.

The base vehicle – the Mercedes-Benz Sprinter double cab – matches the high standards of the cabin in terms of high-quality finish, strength and ruggedness. Rear-wheel drive with twin tyres ensures good traction and safe, reliable driving characteristics on small roads and motorways alike. A gross vehicle weight rating of 5.0 t allows an incredible payload.

The 111 kW / 150 HP or 135 kW / 184 HP turbocharged diesel engines with direct injection are state-of-the-art technology, delivering outstanding power and economy. Both are equipped with a diesel particulate filter as standard.

**2**

**7 8**

**1** The roomy overhead bay with a surface of 215 x 160 cm makes two comfortable berths with underside ventilation and heating. An added bonus: the Froli bed spring system for undisturbed, comfortable sleeping.

**2** The comfortable front settee perfectly conveys the German concept of comfort and cosiness. Its two opposing benches offer comfortable seating for four. Better yet – in a flick of the wrist the settee converts into a bed if additional sleeping space is required. The settees house the electric system and the Truma combination heater.

**3** Behind the front settee you will find a full height shelf rack to place your books and everything you want on hand. Hanging lockers above the front settee and kitchen yield additional stowage space.

**4** An electrically retractable double step leads to the living area.

**5** Behind the door a linen locker offers plenty of shelves.

**6** Adjoining the kitchen is a wardrobe offering a hanging height of approximately 130 cm and even a hat shelf.

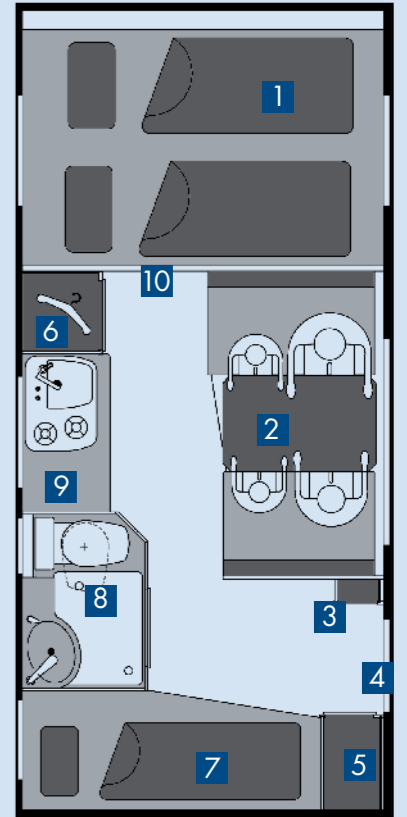

**7** With a surface area of 187 x 75 cm and headroom of 64 cm above the mattress, the rear bunk beds provide plenty of space. Besides equipment such as shelf, textile storage bag, lighting and a window for each bed, there is a special highlight: a 12 V and a 220 V socket (with child safety lock) for operating electronic equipment on rainy days, such as a playstation. Each Bed comes with a curtain for privacy. Below the lower bunk bed a spacious hold – accessible from the exterior – enables storage of bulky equipment, etc. This is also the main access area to the large storage space between the floors.

**8** The sanitary compartment with a floor space of 109 x 77 cm comprises a shower pan and shower curtain, an enamelled steel sink, high quality fittings, mirror and shelf. The swivelling Thetford toilet can be easily moved aside, while the roof hatch and window ensure plenty of light and ventilation.

**9** The cooker/sink combination with glass cover is set into the Resopal® coated kitchen counter (mineral based counter with Luminum grade). Under the work area, a fridge and shelves supplement the kitchen. A cutlery drawer and our trademark spice rack are further highlights.

**10** The passage to the driver cab can be closed off by a curtain. This passage is closed off by a sandwich plate to enable separate use of the carrier vehicle when opting for the quick-mounting system.

The entire living space is mounted on a self-supporting, double-floor made from a sandwich plate, which does not require any stays or beams. This construction results in an under-floor space of 28 cm high, which not only holds the fresh- and waste-water tanks, but serves as hold for camping equipment, surfboards and much more.
