

Compact Rear Seating Layout 4-Motion under 3500 kg

The LB 355 boasts the highly popular 'U-shaped rear seating lounge'. It is built onto the reliable VW T6 Single Cab chassis, which is also available as a 4x4 version, to get you to those remote beaches that other motorhomes cannot reach, and provide confidence on sand/grass banks or on snow.

The flexibility of an AWD vehicle is available here under 3.5 ton in weight and under 6m in length, enabling you to travel quickly, comfortably, incurring less cost for motorway tolls and experiencing fewer parking and driving restrictions.

This layout has a large double bed in the luton at the front, designed to sleep lengthwise, easily accessed by generous sized fold-up steps. The comfortable 'U' shaped lounge located at the

rear, that can be fitted with two seat belts, is easily converted into a further sleeping area for two persons, and has a large garage underneath for storing bikes and sports equipment.

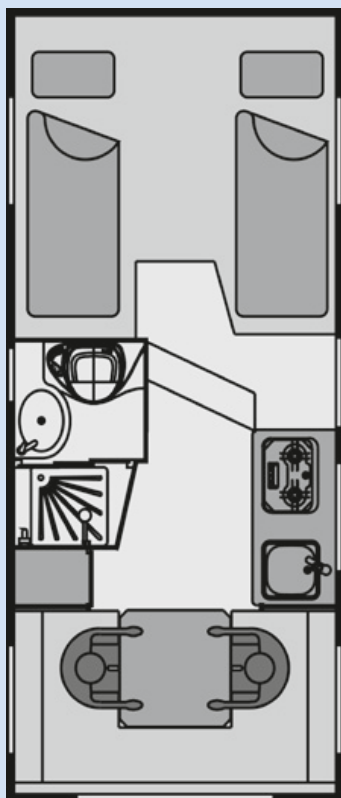

Longer objects can be stored in the double floor, and the overhead lockers, large wardrobe and cupboards provide substantial additional storage throughout.

The kitchen is fitted with a two-burner hob, a separate stainless steel sink with mixer tap, and an absorber refrigerator which will work on 12V, 220V and gas.

The bathroom is spacious for such a compact vehicle, having a separate shower cubicle, wash basin and wc.

This model is also available as a demountable and on Aiko chassis (2x4).
