

SIMPLY CLEVER

ŠKODA

The ŠKODA Yeti

24
WHEEL DRIVE

Effective: April 2013

Welcome to the Yeti

Yeti strikes the perfect balance between on road performance, family orientated practicality and rugged 4x4 styling. With a choice of two or four wheel drive systems on both diesel and petrol engines, as well as flexible Varioflex rear seating, sizable boot space and higher ride height as standard, Yeti is perfect for life in towns and cities.

But if driving off the beaten track appeals, at the mere push of the off-road button, Yeti turns into a highly capable off-road vehicle. It is adept at climbing slippery slopes, descending steep hills and maintaining control on difficult terrain using the very latest in 4x4 systems. Yeti has all the benefits of a 4x4 vehicle combined with the practicality and drive of a family hatchback.

To help you navigate the way to your perfect Yeti, this brochure features 2 wheel drive Yeti from page 10 and 4x4 Yeti from page 18 onward.

Why not take a test drive? Just visit www.skoda.co.uk, click on "book a test drive" and tell us a little about yourself. We'll contact you to arrange a suitable time and date.

Look out for these symbols as you read on. They will guide you through the 2 wheel drive features, 4x4 features, or features of both.

ŠKODA Yeti features and benefits

24
WHEEL DRIVE

Varioflex. The Varioflex system provides Yeti with an extremely flexible and functional array of seat positions. There are over 20 different seating combinations, the main functions are as follows:

Folded table on rear middle backrest

- Outer seats can slide forwards and backwards
- Outer seats can recline by 13.5°
- Middle seat can fold to create an additional armrest with integrated cup holder (SE, SE Plus, Elegance and Laurin & Klement)

Backrests folded down

- All seats can be folded down individually
- All seats can be rolled up (and stowed against front seats)
- Middle seat can be removed and outer seats slid towards centre, creating a two seater in the rear

Seats folded forwards

- There are key differences between the Yeti and Roomster Varioflex seats**
- The middle seat on Yeti is 35mm longer than that of Roomster
 - When the centre seat is removed, the outer seats slide 80mm towards the centre (Roomster slides 110mm)

ŠKODA Yeti features and benefits

24
WHEEL DRIVE

Active safety. Yeti features a range of active safety systems enabling the driver to control the car with ease and is designed to help prevent crashes.

Features and measures preventing and avoiding car accidents = Active Safety

ESC - ESC features a long list of electronic systems designed to stabilise the vehicle in critical handling situations (includes ABS, EBD, EBC, ASR, EDL, HBA, DSR, ESBS - check trim levels for availability, see glossary for further details).

Effective lighting - follows the golden rule of 'see and be seen'. Yeti has an array of lights designed for safety; bi-xenons with corner lighting (standard on Elegance and Laurin & Klement); third rear brake light; front fog lights; cornering fog lights (standard on Elegance and Laurin & Klement); integrated indicators in door mirror housings (much easier to see for other road users); and warning reflectors/lights on all doors (when open).

Tyre pressure monitor - will highlight any loss in pressure of the tyres to the driver. A decrease in pressure could radically change the car's behaviour and drivability, potentially causing an accident.

Disc brakes on all four wheels - ensures maximum braking power, providing the car with the greatest opportunity to stop safely in the event of an emergency.

Activation of warning lights during heavy braking - lets the car behind know of a possible hazard.

Speed dependent electromechanical power steering - the variable assist power steering provides the driver with a lighter steering feel when parking and driving at low speeds, whilst providing more feedback and resistance when driving at higher speeds. This is critical for providing easy manoeuvrability and driving in a safer manner.

Increased visibility of surroundings - Yeti provides the driver with an increased view of the surroundings by using a slightly raised seating position and large window areas. This increases the safety of the driver and occupants by providing a clearer view. Allowing the driver more time to avoid any potential obstructions, vehicles and pedestrians.

View from the car

Passive safety. Yeti features a range of passive safety systems designed to lessen the consequences of an accident.

Features and measures decreasing the risk of injury during an accident = Passive Safety

Body design - the use of high strength materials ensures high levels of chassis rigidity, particularly in the passenger compartment.

Progressive crumple zones - front and rear crumple zones to ensure optimal crumpling to absorb as much energy as possible on impact.

Additional interior protection - areas within the interior where there is a high probability of body contact during a crash, have been specifically designed with properties to provide maximum protection against injury (including dashboard, door panels and B-pillar).

Design of doors - the front doors have been designed with triple side stiffeners, and the rear doors with one stiffener. These increase rigidity and are capable of absorbing energy in the event of a side impact.

Airbags - Yeti is fitted with six airbags as standard on base trim, with an additional driver's knee airbag standard on S, SE, SE Plus, Elegance and Laurin & Klement. Standard airbags on all models are driver and passenger front and side airbags with curtain airbag.

ISOFIX - the two outer rear seats are fitted with ISOFIX brackets, creating a fixed link to the car chassis-important for ensuring the seat is effectively secured in the event of a collision.

ŠKODA Yeti features and benefits

Park assist

(Optional on Elegance and standard on Laurin & Klement)

Park assist is the ideal system when the driver needs to park quickly and accurately. It reduces the stress the driver feels when being pressured to park and minimises the number of bumps, scrapes and dents a car may pick up from parking in a tight space.

- The park assist system uses a set of ultrasonic sensors to find the right sized parking space.

- The Yeti requires a space of approximately 5m in length. The length of the car + 40cm at the front and rear.

- The park assist intervenes in steering, not only when reversing but also whilst moving forward (improvement over Superb).

- To operate, press park assist button. Drive past spaces at up to 18mph and Yeti will search for a space on the passenger side (activating the indicator instructs Yeti to look for a space on the driver's side).

- When a space is found, Maxi-dot displays an arrow reversing into the space with an 'R'.

- Engage reverse. Remove hands from steering wheel. Driver controls speed and braking. Manoeuvre will be cancelled if steering wheel is touched.

- Rear parking sensors sound when the car is near the parked car. Maxi-dot instructs the driver to engage first gear. Drive forward and the system straightens the car.

ŠKODA GreenLine II Technology

As the world becomes more environmentally sensitive, ŠKODA has responded by developing GreenLine II technology. The following information will explain the key technological features of GreenLine II and how they contribute to making a cleaner, greener customer experience, as well as reducing fuel costs for the driver and our impact on the environment. GreenLine II is available on Yeti S, SE and Elegance.

1.6 TDI CR 105PS DPF. The economical four cylinder 1.6 TDI diesel engine in the GreenLine II produces just 119g/km CO₂ which means a VED band of C, which is £0 road tax for the first 12 months.

The Yeti GreenLine II has an excellent combined fuel economy of 61.4 mpg.

Energy Recovery. Energy recovery is the process of converting kinetic energy (energy created through movement) back into usable electricity, which is either stored in the battery, or immediately used again by electrical components on the vehicle.

Depending on driving style, electrical energy is supplied to the vehicle by the alternator or directly by the battery. The principle of energy recovery is to reduce the load on the engine and therefore contribute to lower emissions and reduced fuel consumption.

Low rolling resistance tyres. The Yeti GreenLine II has 16" alloys as standard (205/55 R16 91H) with Nevis alloys on the S and Moon alloys on the SE/Elegance. These lighter alloy wheels with low rolling resistance tyres have a higher prescribed air pressure to reduce friction.

Stop/start System. This innovative system turns off the engine when it is not needed, for example when the driver is stopped at traffic lights or in heavy traffic.

When a normal car is stationary, the engine will idle, which in turn consumes fuel and generates emissions. The Stop/start system cleverly cuts out this unnecessary work by stopping the engine automatically when the car is stationary, in neutral and the clutch pedal is released.

The Stop/start system does not inhibit a quick getaway either. As soon as the driver presses the clutch to put the vehicle in gear, the engine immediately starts up so acceleration is as instant as if the car had been idling.

Aerodynamics. One of the simplest ways to improve fuel efficiency and reduce emissions, is to create a more aerodynamic vehicle. The Yeti GreenLine II has slightly lowered suspension to facilitate better airflow.

To keep the weight and drag of the GreenLine II models down to a minimum and thus ensure the model is as efficient as possible, there is a reduced list of options available. However, the comfort and safety of all occupants has not been compromised and so important features like airbags and air conditioning have been retained.

Gear recommendations. The recommended gear feature on the trip computer or Maxi-dot display shows the driver whether the gear they are in is appropriate or whether they need to change up or down.

The aim is to help the driver achieve optimum engine speed and reduce fuel consumption.

Yeti, at home in the city

After a 4x4 Yeti? Turn to page 18

2
WHEEL DRIVE

On-road

Yeti is perfectly designed for life on the city streets. It combines the practicality of a hatchback with fantastic visibility and amazing flexibility, making it a great family car.

Yeti's higher ride height and rugged design with up to seven airbags as standard is ideal for the school run. There's lots of boot space too so you can load up your shopping, sports kit, gardening equipment, the dog and pushchairs!

Flexible Varioflex seating ensures all passengers can get comfortable with over 20 different combinations. Seats can be moved forwards and backwards, reclined, rolled up individually or completely removed.

Park assist* helps reduce the stress of parking on busy streets. Press the park assist button, take your hands off the steering wheel and whilst you control the speed, Yeti will manoeuvre itself into the parking space.

Yeti can also be an extension of your office. With leather seats, Bluetooth®, cruise control and multi-function steering wheel all available, Yeti is a great choice as a business partner.

There is also a GreenLine II engine in the Yeti range, available on S, SE and Elegance. GreenLine II technology delivers CO₂ emissions of just 119g/km, and excellent fuel consumption. This means less impact on the environment and your pocket.

* Available as an option on Elegance and standard on Laurin & Klement.

4x4 Yeti, at home on the trail

After a 2 wheel drive Yeti? Turn to page 10

Off-road

For those needing a sturdy and versatile car that can handle outdoor living with ease, the 4x4 Yeti is for you. With one of the latest 4x4 systems and some very clever technology, Yeti handles most off road situations, slippery roads or rough ground.

Off-road button*. By pushing the off road button, Yeti helps maintain control when the driving conditions get tough. It will maintain a constant speed downhill on a steep slope (over 8%), maintain traction going uphill and stop over revving of the engine, hold the car still on a hill start and help prevent the wheels from spinning on loose surfaces or wet, slippery roads.

4x4 system. The latest generation 4x4 system helps you maintain control and stability at all times. The system senses what is happening on each wheel and quickly transfers power or automatically applies brakes when needed to give more grip or drive to keep you on your chosen path.

Rough road package. Available as an option on S, SE, SE Plus, Elegance and Laurin & Klement. The rough road package comprises of:-

- > A thermoplastic cover for the engine and transmission
- > A plastic cover for the fuel and brake lines
- > Reinforced brake fluid distribution system and hand-brake cable

The vehicles ground clearance is not affected by the installation of this package and remains at 180mm.

* Standard on Elegance and Laurin & Klement 4x4. Optional on S, SE, and SE Plus 4x4 models.

The off-road button* has a set of intelligent functions to aid driving on difficult, slippery surfaces, further increasing the safety of driver and passengers. The system is enabled when the button is pressed and illuminates. The driver does not need any previous off-road experience to feel the benefits of this easy to use system.

Uphill start assist.

- > Used to assist in pulling away on wet, slippery or snowy road surfaces
- > Allows the accelerator to be fully pressed but with the RPM restricted to 2,500
- > Helps prevent damage to the clutch and engine
- > Allows driver to maintain control

Downhill assist.

- > Maintains a stable speed during descent down slippery, wet or snowy road surfaces
- > Engine is running, but is engaged in neutral, first, second, third or reverse gear
- > ESC brakes the wheels individually, preventing locking
- > In neutral the driver does not have to press accelerator or brake pedal
- > Allows the driver to concentrate fully on steering the car

ABS off-road.

- > Improves braking effect of the car
- > Longer braking creates a 'chock' of surface material, enhancing vehicle control
- > Only active up to 30mph

ASR off-road.

- > Improves acceleration on slippery surfaces
- > ASR is set to manage a higher slippage on the driving wheels
- > Helps maintain driver control and vehicle stability

EDL off-road.

- > Maintains permanent traction of the car
- > Can work diagonally across axles
- > Brakes the slipping wheel(s)
- > Helps maintain driver control and vehicle stability

K	201 - 225	£620	£280
L	226 - 255	£840	£475
M	Over 255	£1,065	£490

OTR (Recommended On The Road)

* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.

VED (Vehicle Excise Duty)

** All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO₂ figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

¹First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.
²Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Edition: UK 1st April 2013.
 VAT is calculated at 20%.

Company car tax is based on your cars carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 38.

P11D (Expenses and Benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)
 The BiK percentage value is based on the CO₂ emissions of the vehicle for the current tax year 2013/2014.

Note - Silver roof rails available as an option (excludes E). See page 26 for details.
Because of errors which may occur in the print, the colours illustrated here may differ from the actual finishes themselves. Your ŠKODA retailer will be pleased to advise you.

The ŠKODA Yeti colour roof options

24
WHEEL DRIVE

You can now select a black, white or silver roof for your Yeti, adding a brand new level of personalisation to your car. Coloured roofs are available on S, SE, SE Plus, and Elegance. See page 26 for prices.

Please note: The following colour combinations are not available:

- Black roof with Petrol Blue metallic, Storm Blue metallic or Pacific Blue body.
- Silver roof with Candy White body.
- White roof with Brilliant Silver metallic body.

Tank

Fuel tank content (litres) 55 (60 for 4x4)

Fuel Unleaded petrol min. RON 95 (91) or diesel.

Body type

Five-door, two compartment, 5 seater

Drag coefficient - 0.37 (0.361 GreenLine II)

CR = Common rail .

Official fuel consumption for the Yeti range in mpg (litres/100km):

urban 28.0 (10.1) - 54.3 (5.2);
extra urban 40.9 (6.9) - 67.3 (4.2);
combined 35.3 (8.0) - 61.4 (4.6).

CO₂ Range 189 - 119 g/km

†Lower efficiency when using lower RON petrol.

We measure the maximum power output figures of our engines in PS or Pferdestärke (horse strength in German), which is the metric equivalent of bhp. To convert from metric to imperial horsepower, divide the PS figure by 1.0139.

* Official fuel consumption according to EU Directive 99/94. The consumption calculation according to 1999/100/EC is based on the actual unladen weight of the vehicle. Additional specifications can lead to a higher weight class and hence to consumption figures of this higher weight class. The driving style, road and traffic conditions, environmental influences and vehicle condition can in practice lead to consumption figures which may differ from those calculated in this standard.

ŠKODA Finance. Your journey, your choice.

ŠKODA Finance like to do things a little differently, that's why for many years we've specialised in providing simple and convenient funding options for ŠKODA drivers. It's what we know.

ŠKODA Solutions is all about you; a flexible, competitive fixed-rate plan designed around you and your budget, putting you firmly in the Yeti driving seat.

Solutions is different because you defer a proportion of the car's value until the end of the agreement, giving you significantly lower monthly repayments than if you'd taken out a loan... ever heard of a bank being so imaginative?

Solutions is totally flexible. You get to choose the size of your deposit (from as little as one monthly payment), and a repayment period which suits you and at the end of the term you have 3 options to choose from.

1 Part-exchange the car for a new ŠKODA on a new Solutions contract.

2 Pay the optional final payment so that you own the car.*

3 Or return the car to us (subject to terms and conditions).

ŠKODA Finance also offers:

• Hire purchase • Contract hire • Service plans • Insurance

Speak to your ŠKODA retailer for your personalised quotation today.

*Subject to payment of the option to purchase fee. An offer of finance depends on certain conditions. Subject to status, indemnities may be required. Available to over 18's in the UK only. ŠKODA Finance.

ŠKODA Insurance. Have a safe trip.

We want you to start enjoying your new car from day one and thanks to ŠKODA Insurance complimentary seven day cover you can. Call free on 0800 316 7895, provide us with a few details, and we'll send a cover note to your retailer. They will then tax your car and you can drive it away. Telephone lines are open Monday to Friday 8am - 9pm and Saturday 9am - 5pm.

For details of our full range of insurance products visit www.insurewithskoda.co.uk You can get an annual car insurance quote for your ŠKODA and buy it online too.

DEPOSIT

As little as one repayment

BALANCE

A flexible repayment period (18-42 months)

OPTIONAL FINAL PAYMENT

3 choices at the end of the agreement

ŠKODA Finance is a trading name of Volkswagen Financial Services (UK) Limited, Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR. Registered in England number 2835230.

ŠKODA Insurance is a trading name of Volkswagen Insurance Service (Great Britain) Limited, an appointed representative of Volkswagen Financial Services (UK) Limited, registered in England number: 2835230 (registered office: Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR). ŠKODA Insurance motor insurance is sold, underwritten and administered by Allianz Insurance plc, registered in England number: 84638 (registered office: 57 Ladymead, Guildford, Surrey GU1 1DB). Both organisations are authorised and regulated by the Financial Services Authority (FSA), whose registration numbers are 311988 and 121849 respectively. Authorisation details can be checked on the FSA's register at fsa.gov.uk or call 0845 606 1234. Volkswagen Financial Services (UK) Limited and Allianz Insurance plc are not part of the same corporate group.

Owning a ŠKODA

We make sure it's easy, fun, and stress-free.

ŠKODA customer service is officially award-winning. We have been voted Number 1 in the 2012 Driver Power survey for the fourth year running.

Network capability

You can enjoy our award-winning customer service through our network of around 165 Authorised Repairers.

As a ŠKODA customer, you will be looked after by your retailer from the moment you walk through the door and throughout the life of your ŠKODA. Your Yeti will be serviced and maintained to the highest standards by specially trained ŠKODA technicians. And when you need a spare part, you'll be happy to know that most are held in stock, or can be ordered within 24 hours.

The ŠKODA Customer Promise is a commitment from our retailers to offer:

- > Care and consideration for you and your car
- > A flexible and convenient service
- > Expertise and attention to detail
- > A clear explanation of our work

Roadside Assistance

A three year, European-wide, unlimited mileage ŠKODA Assistance policy comes free of charge with every new ŠKODA provided by the RAC through a dedicated team.

Provided through the RAC, there's a team of specially trained Technicians carrying the right diagnostic equipment and parts to get you back on the road as quickly as possible in the unfortunate event of a breakdown. They'll even help you if you fill up with the wrong fuel, lose your car keys, or get a puncture.

Warranty

When you buy your new ŠKODA through our authorised retailer network, it is automatically covered by a three year, 60,000 mile manufacturer's warranty.

There's no mileage limit on the warranty in the first two years and for additional peace of mind there's a 12 year body protection warranty.

You can even extend your warranty to four or five years, see the option page for prices and page 39 for further details.

Warranty cover from new			
First 2 years	First 3 years	4-5 years	Up to 12 years
Unlimited mileage	3 years or 60,000 miles, whichever is sooner	Optional Extended Warranty	Body Protection Warranty

Further information

You can find lots of additional information about owning a ŠKODA on our website at www.skoda.co.uk. Our retailers are always happy to help with any questions, backed up our dedicated Customer Service Centre. We look forward to hearing from you soon.

 Open 8.30am - 5.30pm

Technical glossary

ABS: the anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

Elements of the ABS System :-

• **Dual Rate Vacuum Brake Boosters:** increases brake effort under emergency braking conditions.

• **EBC:** Electronic brake control. The engine brake torque control regulates the power supply by intervening with the engine management system.

• **EBD** (aka EBV): Electronic Brake Distribution automatically distributes different pressures to the front and rear brakes to stop the rear wheels from locking up under heavy braking. It also compensates for loaded and unloaded vehicles therefore doing away with the need for a Load Sensing Valve on the rear axle.

• **MBA** Mechanical brake assist uses a mechanical device inside the brake servo. If the brake pedal is pressed rapidly , it activates the mechanical device to give maximum braking pressure to the wheels, even if the driver is not pressing the brake pedal particularly hard.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

Fuel cut-out: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

Trip Computer: the trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.

CR: the completely new range of diesel engines are built on a system of Common-Rail fuel injection. The diesel engines have a high-pressure common rail direct injection fuel system and four-valve technology. As a result, the new engines are much quieter, more refined in their operation and consume less fuel, compared to the Pump Duse engines and significantly reduce emissions.

DPF: diesel particulate filter is part of the exhaust system responsible for cleaning the engine exhaust gases before they enter the atmosphere. The DPF catches soot particles emitted in the exhaust gas and it works in conjunction with the catalytic converter, which reduces the amount of harmful gases entering the atmosphere. The DPF must periodically be emptied of the soot particles, a process known as regeneration. This involves elevated exhaust system temperatures. A driving style is required during regeneration, where a constant vehicle speed above 37 mph must be maintained. This does not always suit customers who make frequent short journeys or experience stop/start driving or drive within inner-city or urban areas.

ESC: Electronic Stability Control is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESC constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESC reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine’s output.

Elements of ESC system:-

• **ASR:** anti-slip regulation traction control ensures the Yeti’s stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

• **MSR:** the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

• **EDL:** the electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

• **HBA:** Hydraulic brake assistant increases the optimal build-up of brake power. It ensures complete use of the brake system potential, thus shortening the braking distance.

• **HHC:** Hill hold control allows for a safe hill start by holding the brake for a small amount of time, reducing the risk of unintentional reversing or roll back.

• **TPM:** Draws the driver’s attention to any pressure loss in any of the tyres. Early warning can prevent damage from occurring as a result of an under inflated tyre or a defect that radically changes the cars behaviour and driveability.

• **DSR:** Driver Steering Recommendation – in a crisis situation it helps the driver stabilize a skid by making a slight intervention in the steering.

• **ESBS:** Electronic Stability Brake System – targeted interventions in the braking process improve the handling of a car as it brakes when passing round a bend and keeps it from veering.

• **AFM:** records and assesses all available data about the journey to optimize the ESC system’s reactions, which can thus be adapted to any driving style and the current vehicle payload.

• **Xenon lights:** the Xenon lights produce about 2.5 times the light of standard Halogen lights with 35% less energy consumption.

Extended warranty

Exclusions and limitations

Wear and tear components will only be considered under the terms of the warranty for the first of six months or 6,500 miles, whichever is soonest. These include, but are not limited to brake linings and disc pads, clutch release bearings, clutch pressure plates and centre plates, tyres, wiper blades, seat and backrest covers, floor coverings, spark plugs, batteries for key fobs and alarms, light bulbs and shock absorbers.

Mechanical adjustments including but not limited to adjustments to doors, flaps, boot lids, bonnets and sunroof, brake adjustment, clutch adjustment, v belt adjustment, ignition adjustment, headlight adjustment, steering geometry adjustments and wheel balancing are excluded.

Damage (including but not limited to the following) is excluded:

➤ Damage caused by your failure to take all reasonable steps to prevent mechanical damage from occurring.
➤ Damage or defects caused by not having the vehicle serviced in accordance with the manufacturer’s guidelines.
➤ Damage or defects caused by improper use of the vehicle, neglect or use of the vehicle for motor sports activities.
➤ Damage caused by an accident.
➤ Damage to paintwork or chrome caused by external influences, such as climatic, chemical or industrial pollution.
➤ Damage resulting from the use of non-original replacement parts.

Routine maintenance and servicing is not covered by the warranty. Incidental or consequential costs such as hotel charges, car hire, loss of personal effects or income are not recoverable under the terms of the warranty.

Service Intervals

When you order your Yeti, you can choose whether your car is on a fixed or a flexible service regime. Your retailer will help you decide which regime suits how your car will be driven, enabling your car to stay in the best possible shape.

Fixed regime: Service every 10,000 miles or one year (whichever comes first). This is recommended if the vehicle is likely to be used in the following way:

➤ Driven fewer than 10,000 miles per annum **and/or**
➤ Mainly short journeys, drive mostly in towns or cities **and/or**
➤ High vehicle loading/towing and frequent hill climbs **and/or**
➤ Heavy accelerating and braking, using high revs

Flexible regime: Sensors in the engine detect when a service is needed. You will be informed of this by a service light which will show at any point between 9,000 and 20,000 miles, up to 24 months (whichever comes first).

The flexible service regime is recommended for vehicles with a daily mileage of more than 25 miles where the vehicle is driven regularly and mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

Motability

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from ŠKODA. Preferential prices on low cost Contract Hire are available through your local approved Motability retailer. For full details, contact your retailer.

Calculating your tax liability

To find out how much tax you will pay, simply take the P11D value, then multiply this figure by the BiK percentage. Then simply multiply this figure by 20% or 40% depending on the level of income tax that you pay.

Please note if your employer provides you with free fuel, this is treated as an additional taxable benefit.

For more information on company car taxation please visit the HM revenue and customs website www.hmrc.gov.uk

BiK calculation example- Yeti S GreenLine II 1.6 TDI CR 105PS DPF	
P11D value	£17,290.00
Company Car BiK tax based on CO ₂ emission level	18%
Taxable BiK (for 2013/2014 tax year): 18% of £17,290.00	£3,112.20
Annual company car tax (2013/14)	
20% Income Tax: 20% of £3,112.20	£622.24
40% income Tax: 40% of £3,112.20	£1,244.88
Monthly company car tax (2013/14)	
20% Income Tax: £622.44 divided by 12 months	£51.87
40% income Tax: £1,244.88 divided by 12 months	£103.74
